The golf clubs achieve
premium performance and the
look is like a crafted artwork
with customized design

www.mtgrind.com

We proudly represent the products from Japan's MT Grind Studio – designed by Master *Takai Mayuki*. The main products will include custom ordered, handcrafted drivers, irons, wedges, and putters.

Across Asia, this specific line of products is widely known as 'Itobori' (in Japanese), which generally refers to the very first step of mastering golf products. One feature that distinguishes Itobori products from other golf manufacturers is the unique design, which is marked by roughly cut edges and finishes. That being said, the performance of Itobori golf products are also exceptional. All of the heads focusing on every aspect of balance, hand crafted with premium technique and also has high tolerance – can be set up at any lie and navigates perfect impact. Itobori golf products can be 100% personalized, and each product is handcrafted according to the specific needs and requests by the customers. These include lie and bounce options, weight of the club head, and the design and finish of the clubs. As all Itobori golf products are custom ordered and built, only a limited number of products see the market every year. We are so excited to represent this special and unique line of products to global markets.

Itobori | *Black IP Driver*

The driver head that is 450cc in size is a bit smaller than 460cc ones that are generally used by many people. (Smooth grip and great straightness of deep-faced 450cc head). It has a nice repulsive force which is consisted of Dat-55 titanium material and the proven COR 0.8296 coefficient restitution is closed to authorized limits, and CT level comes up to 252 which provides the maximum coefficient restitution of authorized limits. Also, low center gravity design Deep Face lowers backspin occurrence so it extends driving distance.

Dat-55 Titanium Face 6-4 Casting Body

Loft 9.5° / 10.5°

The center of gravity angle 16.9°

The center of gravity distance 35.6mm

The depth of the center of gravity 34.10mm

100 Limited Edition

Itobori | *Silver Titanium Metal Driver*

Itobori | *Driving Iron*

Driving Irons have great touch and nice weight as well as in premium quality using hand hammered crafted irons made by Master *Takai Mayuki*. Recommend the Itobori's driving iron for people who have hard time using the utility and woods. The design of clubs are amazing and navigate perfect impact and direction.

Plating Variety

Chrome

Black Chrome

Under Copper Edition

is made with plating nickel chrome/bronze first and plating with chrome one more time on the surface, giving the smoothest surface possible.

Itobori | Irons Set #4 - Pw

Itobori's irons and wedges have been proved to create incredibly soft impact feel, power, and accuracy - performing more backspin compared to other brands in the market. Iron head has 2 types, Muscle and Cavity.

Iron Specification								
	3	4	5	6	7	8	9	PW
Loft	21	24	27	31	34	38	42	47
